

Environmental Policy

Rilub S.p.A. was born in 1990 and it's interested in the following sectors:

1. blending and packaging of lubricating oils;
2. blending and packaging of chemical products;
3. production plastic packing.

The Direction, aware of the importance to guarantee the environment guardianship, proposes the following policy to spread and to apply to all the business levels:

- *to know and to respect the environmental regulations;*
- *to implement the necessary actions to develop professional competence and necessary skills to ensure the proper management of environmental processes;*
- *to evaluate employees for their commitment and the results obtained in the environmental processes management and the ability to handle environmental emergencies;*
- *to reduce the consumption of resources and energy (for example: to use high performance equipment);*
- *to use recyclable materials and equipment and / or having a low environmental impact, like:*
 - o clean energy sources;*
 - o detergents to tall degree of biodegradability;*
 - o equipment that do not contain gas contaminants (such as air conditioners and refrigerator free of freon);*
 - o equipment disposal do not give rise to contaminants;*
- *to find appropriate solutions to ensure the treatment of rubbish;*
- *reduce the direct and indirect costs due to poor environmental management;*
- *to verify the state of environmental management by numerical indicators;*
- *to pursue and to reach new goals in order to achieve continuous improvement.*
