

**Product:** **EMULSYNT**

**Description:** Emulsifiable lubricant formulated with synthetic bases and a emulsion stabilizer of modern design which makes the water milky emulsion extremely stable over time. E 'free chlorine and / or compounds. The product can be used in any conventional processes such as grinding, turning, milling, saw to cut all ferrous materials. The concentration of recommended use varies from 2% to 8% depending on the severity of the operation.

**Percentage of use recommend:**

- 2 % FOR GRINDING
- 3-5 % FOR TURNING AND MILLING
- 5-7 % FOR DRILLING
- 5-7 % FOR TAPPING AND THREAD
- 6-8 % FOR THE SAW CUT

**Properties:**

Specifications	Test Method	Unit	Value
Appearance	VISUAL		Liquid Clear / Amber
Density at 15°C	ASTM D 1298	Kg./dm <sup>3</sup>	0,915
pH Emulsion at 3%			7,9 – 8,3
Corrosion Testing	IP 125		Pass
