

**Product:** **MEGA T04**

**Description:** Lubricant for earth-moving machines, which require that CATERPILLAR specifications be exceeded, with particular viscosity stability on account of the hard work required.

**Specification:** **SAE 30 / 50**      **ZF TE ML 03/07F**  
**CAT T04**                      **API CF/CF2**  
**KES 07.8681**

**Properties:**

| Viscosity<br>SAE | Density at<br>15°C kg/l | Flash Point<br>V.A. °C | Pour Point<br>°C | Cinematic Viscosity<br>mm <sup>2</sup> /s (cSt.) a |       | Viscosity<br>Index |
|------------------|-------------------------|------------------------|------------------|--|-------|--------------------|
|                  |                         |                        |                  | 40°C   | 100°C |                    |
| 30               | 0,888                   | 230                    | -24              | 100  | 11,5  | 102                |
| 50               | 0.902                   | 250                    | -21              | 190  | 18    | 103                |
